

Setting Up and Creating Test Cases in JIRA

1. Đăng ký tài khoản JIRA:

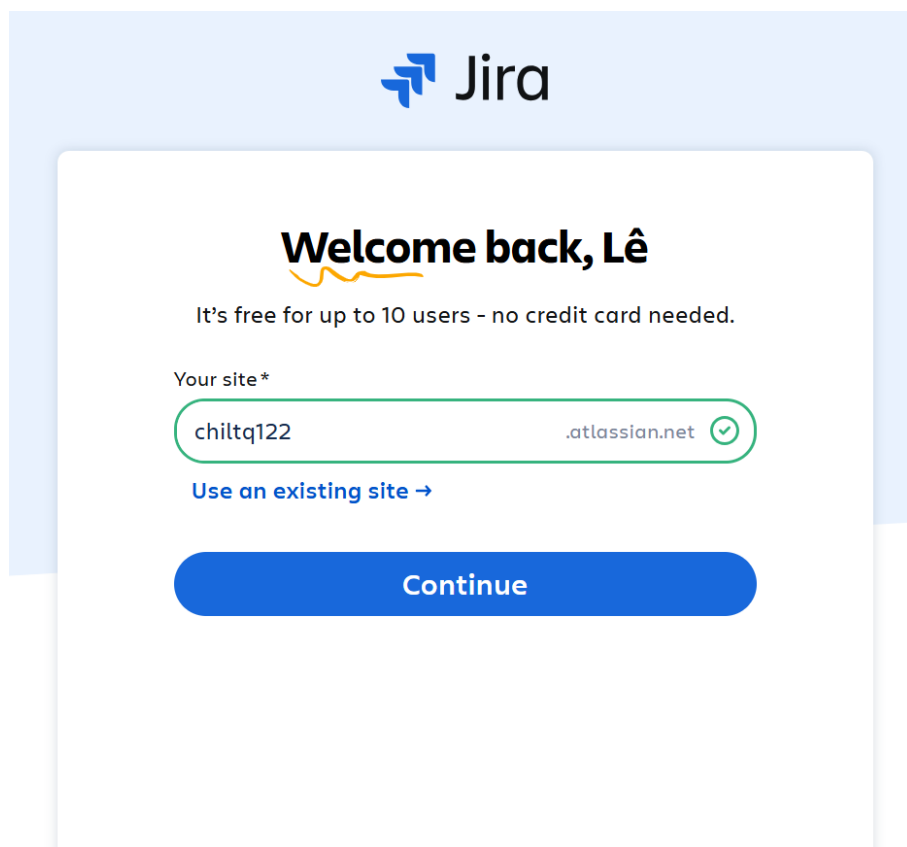

Bước 1: Vào link <https://www.atlassian.com/software/jira> → Chọn Get it free

Bước 2: Chọn tài khoản fpt.edu.vn để đăng ký

Bước 3: đặt tên website jira → sau đó click Continue

The image shows the Jira welcome screen for a user named Lê. At the top, the Jira logo is displayed. Below it, the text "Welcome back, Lê" is shown with a yellow wavy line under "back". A message states "It's free for up to 10 users - no credit card needed." Below this, the label "Your site*" is followed by a text input field containing "chiltq122" and ".atlassian.net" with a green checkmark icon. A link "Use an existing site →" is positioned below the input field. At the bottom, there is a large blue button labeled "Continue".

Jira

Welcome back, Lê

It's free for up to 10 users - no credit card needed.

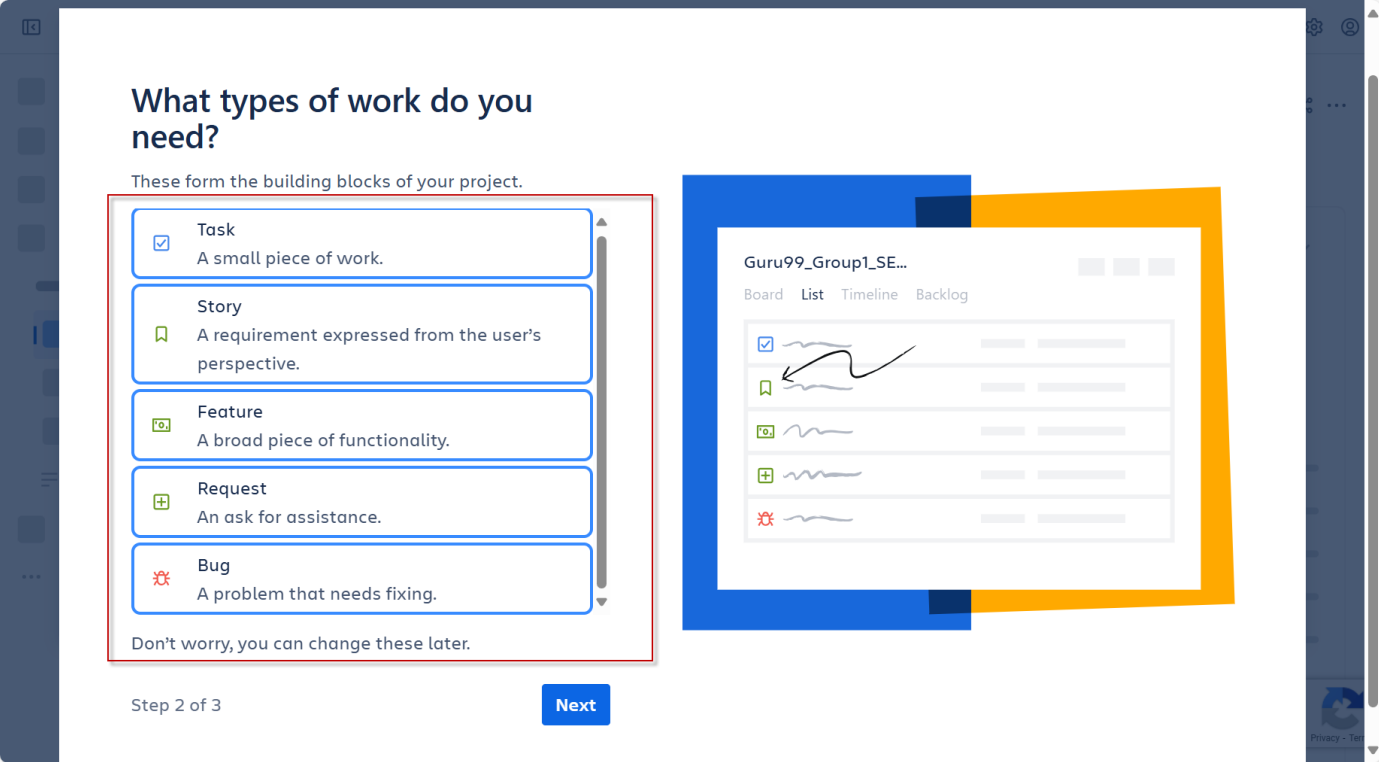

Your site*

chiltq122 .atlassian.net ✓

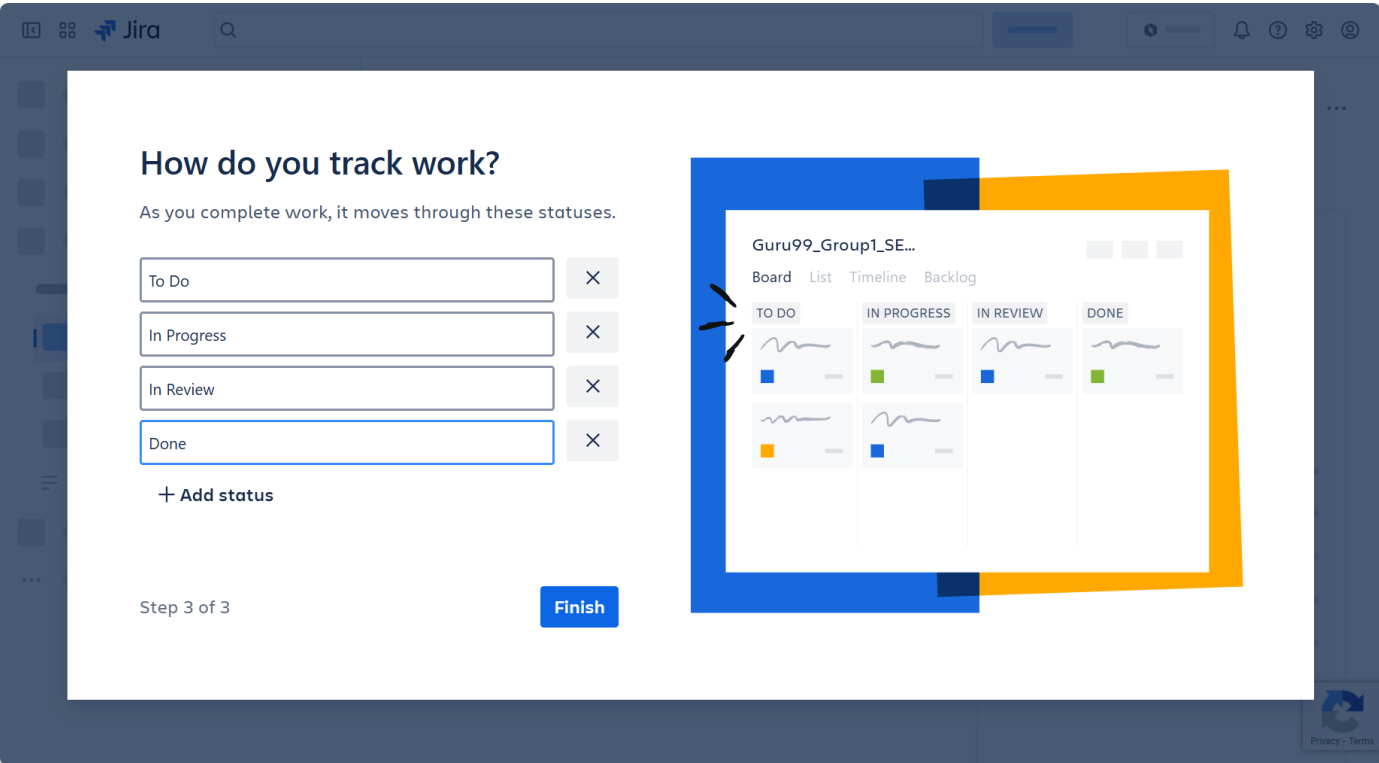

[Use an existing site →](#)

Continue

Bước 4: Chọn toàn bộ các type như hình dưới:

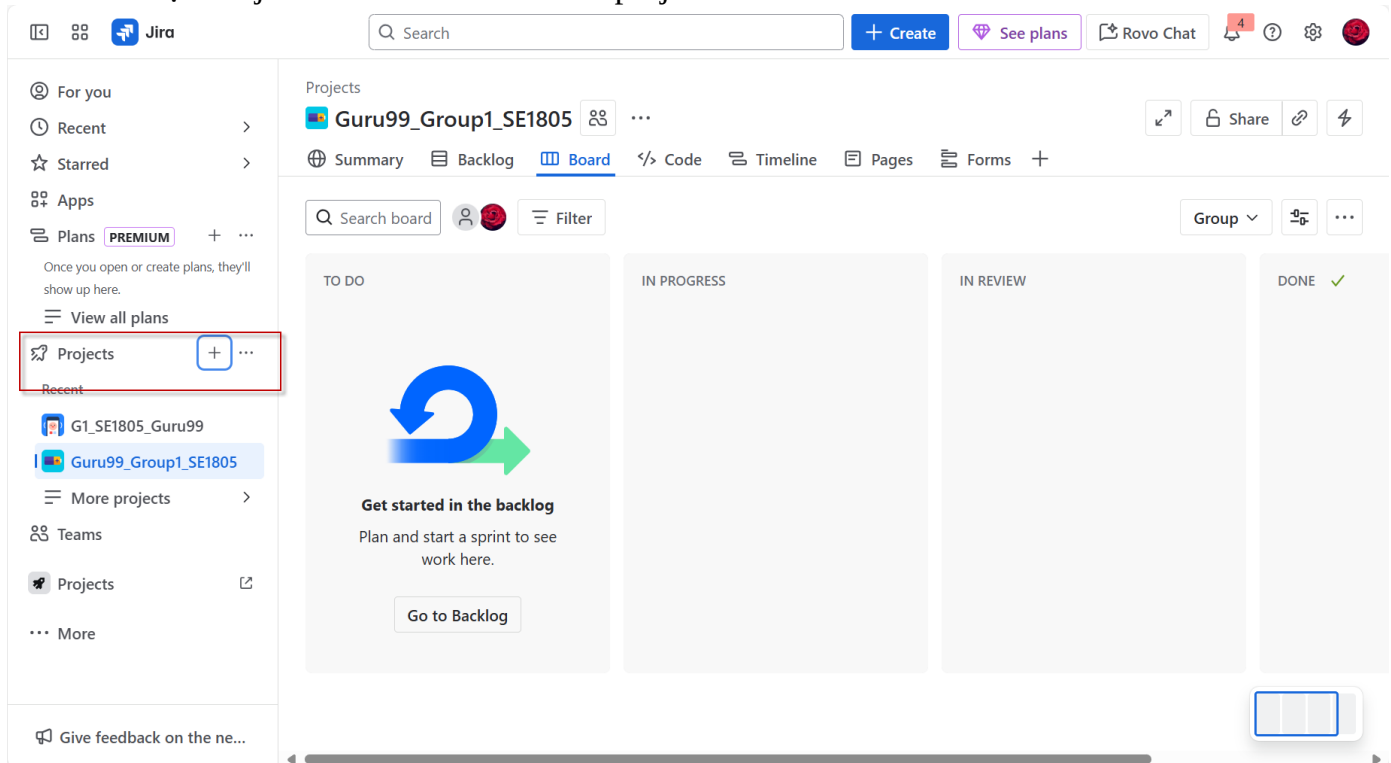

Bước 5: Finish

2. Tạo project và thêm thành viên:

Bước 1: Tạo new project

Chọn Project → Click “+” to Create project

Bước 2: Chọn Project templates: Scrum → Use template

Scrum

Use template

×

he Scrum template helps teams work together using sprints to break down large, complex projects into bite-sized pieces of value. Encourage your team to learn through incremental delivery, self-organize while working on a problem, and regularly reflect on their wins and losses to continuously improve.

☒ ✓ ☐

☒ ✓ ☐

☒ ✓ ☐

Plan upcoming work in a backlog

Prioritize and plan your team's work on the backlog. Break down work from your project timeline, and order work items so your team knows what to deliver first.

[Learn more about the backlog](#)

Organize cycles of work into sprints

Sprints are short, time-boxed periods when a team collaborates to complete a set amount of customer value. Use sprints to drive

Product

Jira

Recommended for

Teams that deliver work on a regular cadence

DevOps teams that want to connect work across their tools

Bước 3: Chọn Project Type: **Select a company-managed project**

← Back to project templates

1 Project template

Scrum
Jira
Sprint toward your project goals with a board, backlog, and timeline.

Change template

2 Choose a project type

 You'll need to create a new project if you decide to switch project types later.

Team-managed

Set up and maintained by your team.

For teams who want to control their own working processes and practices in a self-contained space. Mix and match agile features to support your team as you

Select a team-managed project

Company-managed

Set up and maintained by your Jira admins.

For teams who want to work with other teams across many projects in a standard way. Encourage and promote organizational best practices and processes

Select a company-managed project

Bước 4: Đặt tên cho project → Click chọn Create project STTNhom_Lop_DuAn (G1_SE1805_Guru99)

← Back to project types

Add project details

Explore what's possible when you collaborate with your team. Edit project details anytime in project settings.

☐ Share settings with an existing project

Template Change template

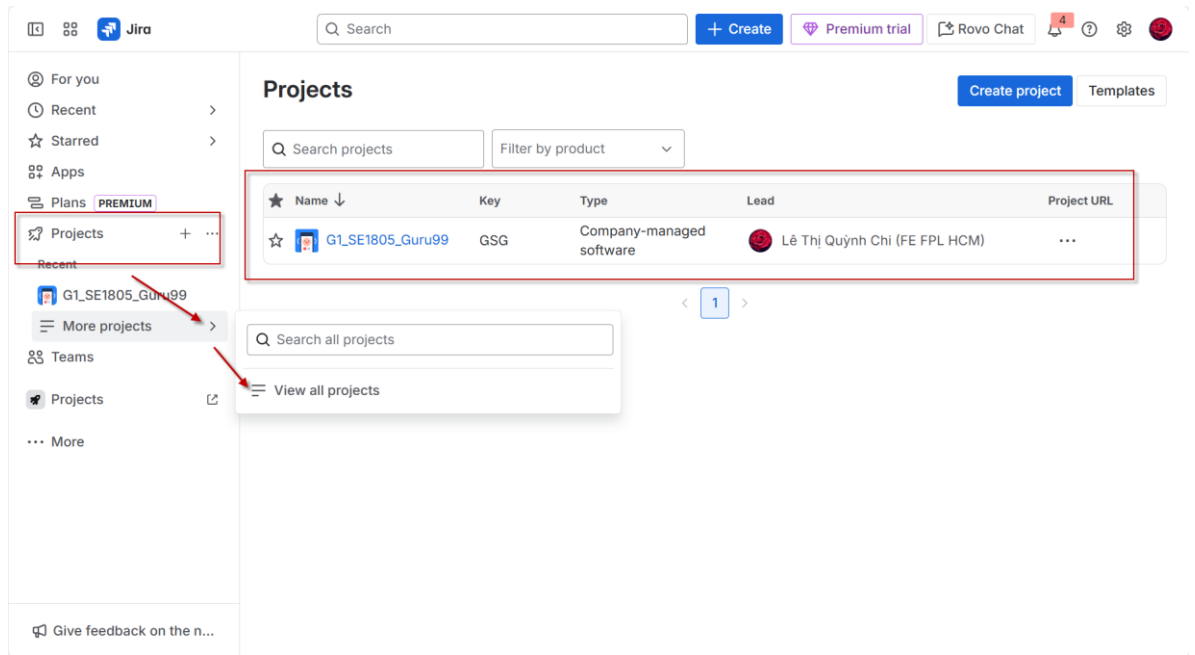

Scrum
Jira
Sprint toward your project goals with a board, backlog, and timeline.

Type Change type

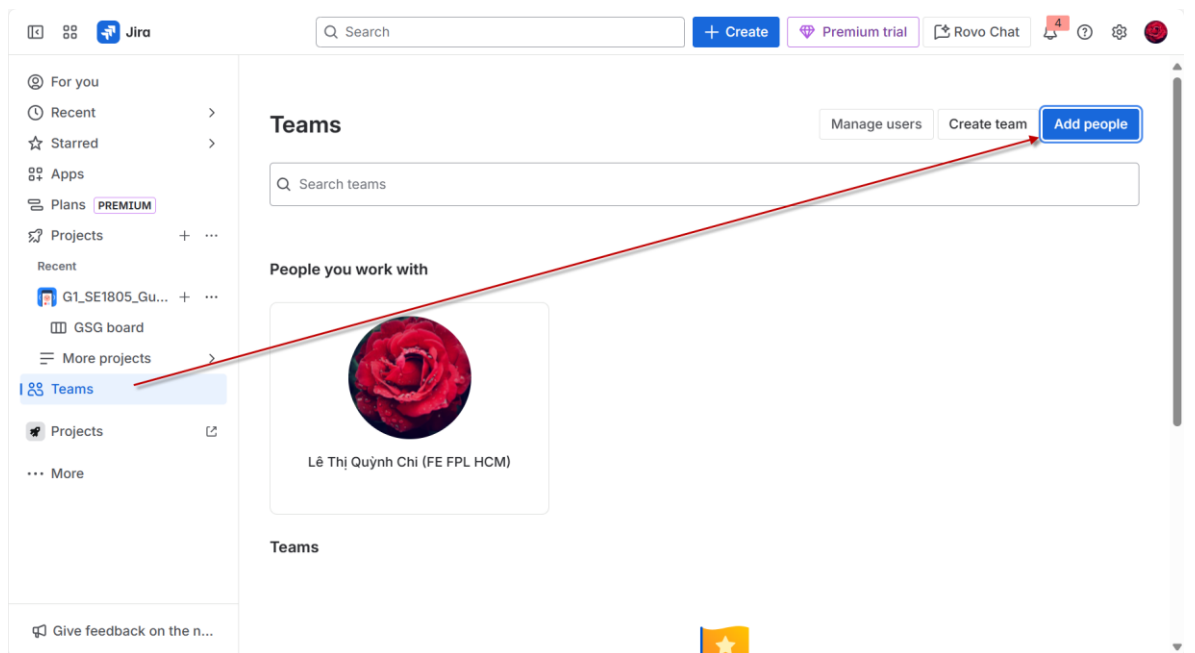

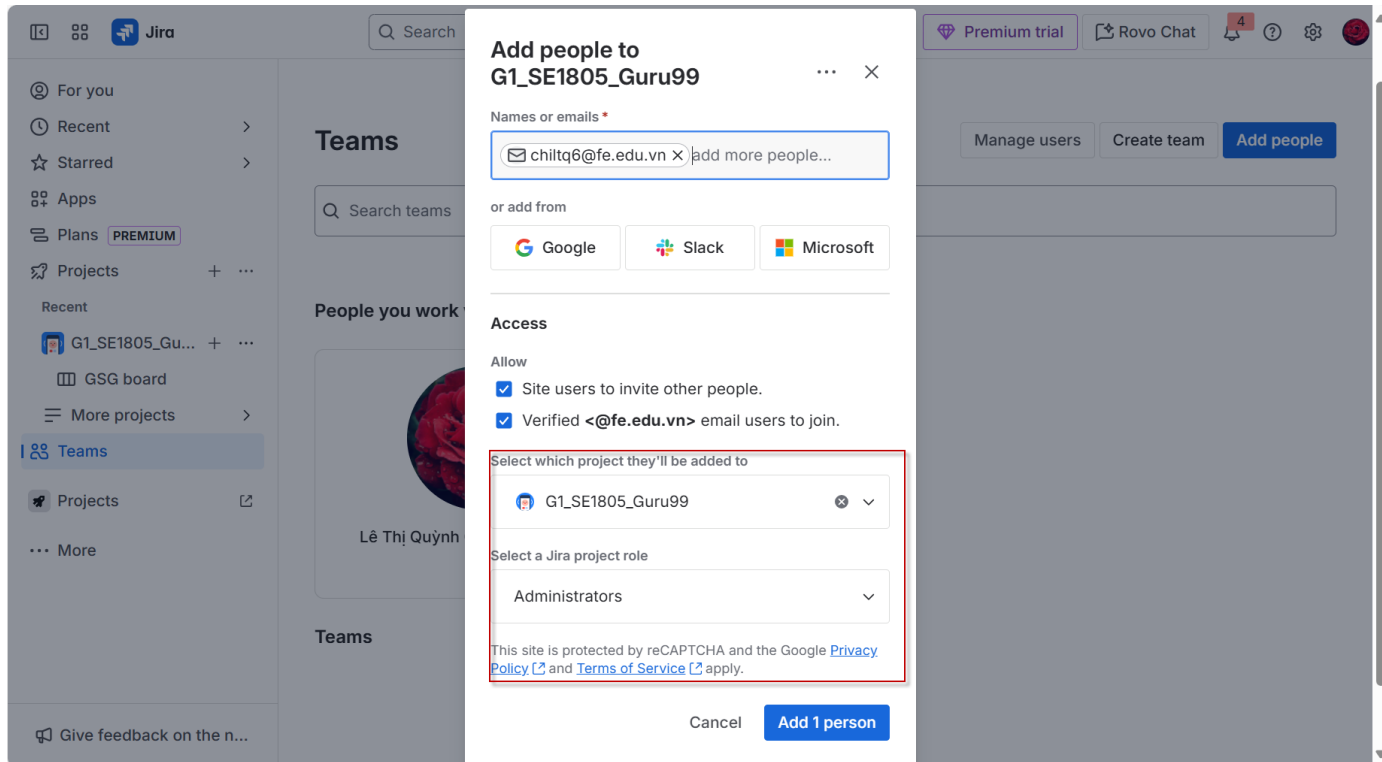

Company-managed
Work with other teams across many projects in a standard way.

Cancel Create project

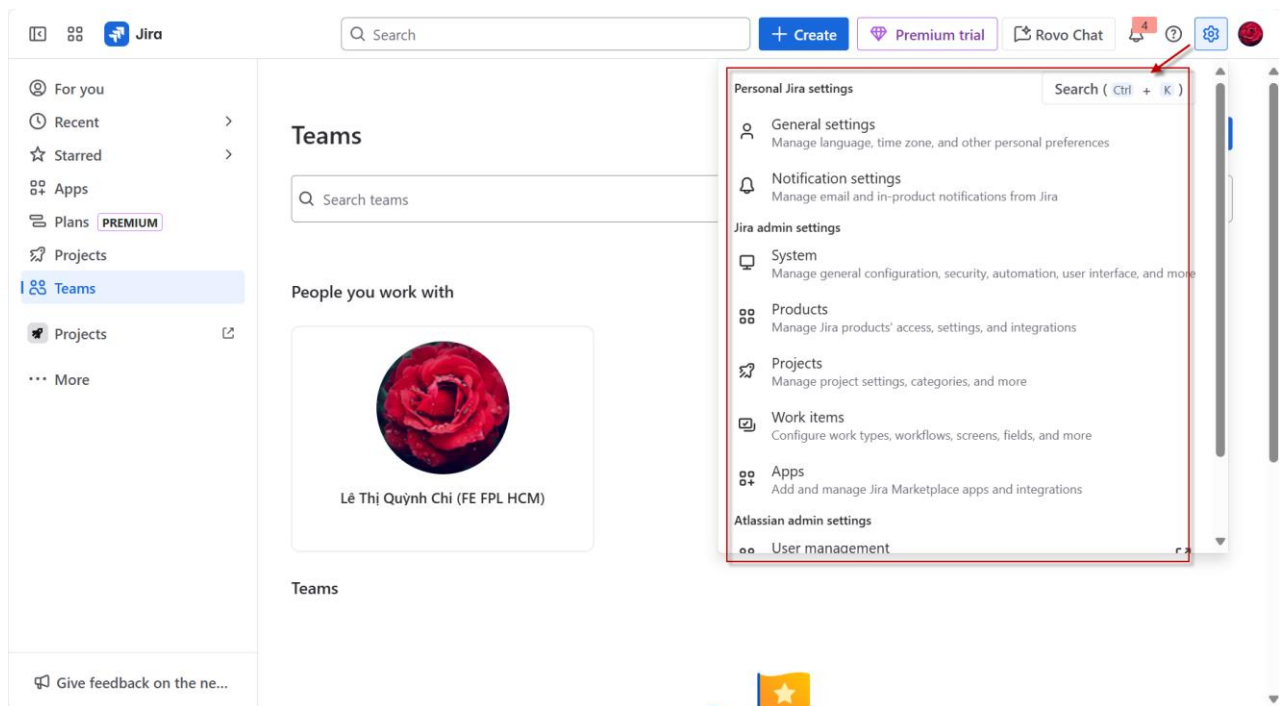

Bước 5: Vào Teams → Add people → Nhập email thành viên cần add vào project (Chọn dự án + phân quyền Admin cho thành viên)

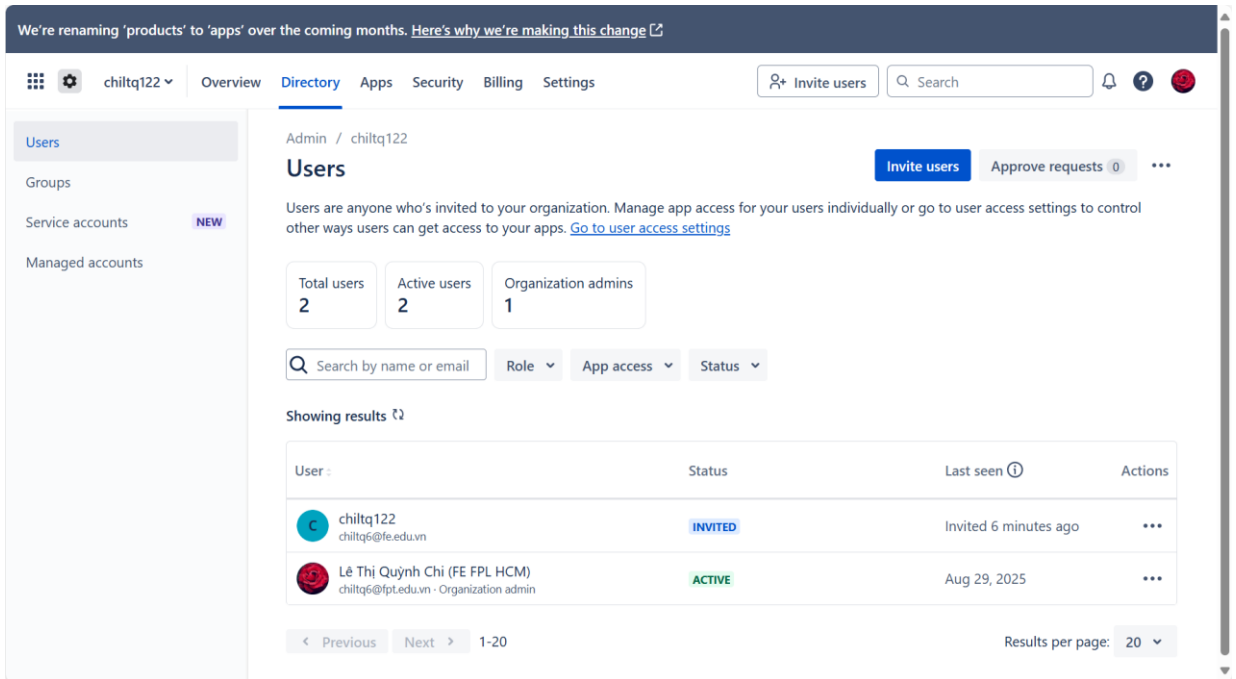

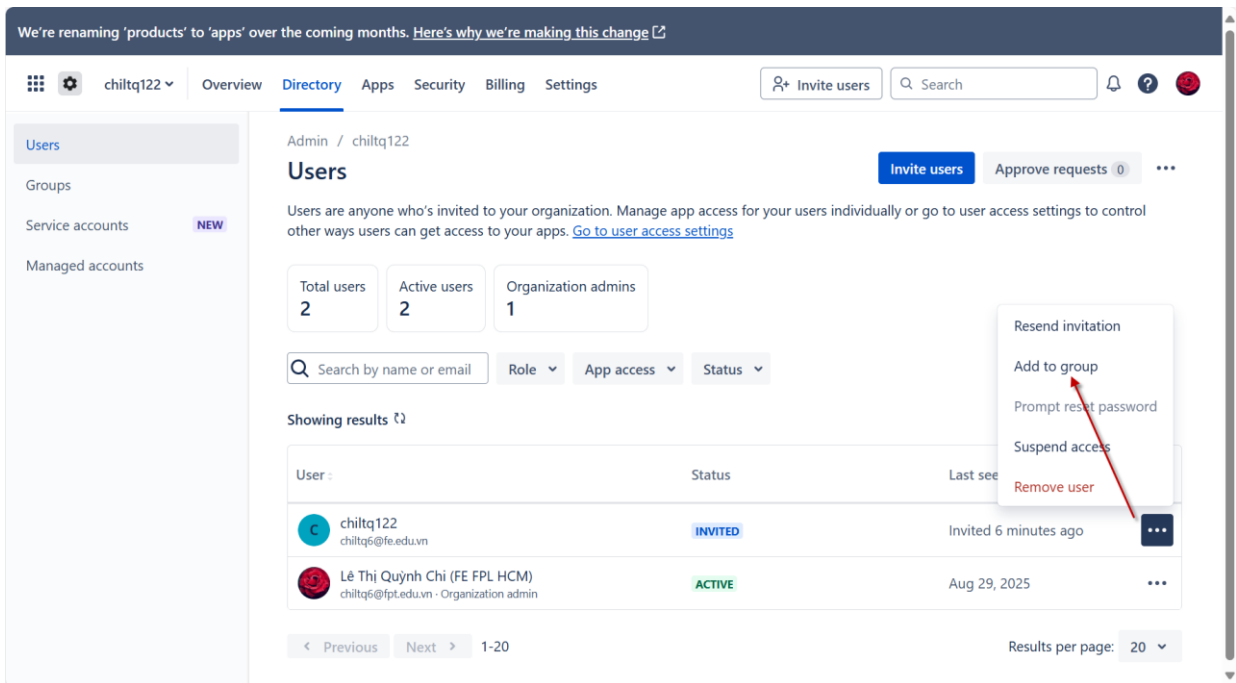

Bước 6: Phân quyền người dùng: Nếu thành viên được add vào project nhưng khi click vào icon “Setting” không show đầy đủ như bên dưới thì thực hiện phân quyền người dùng:

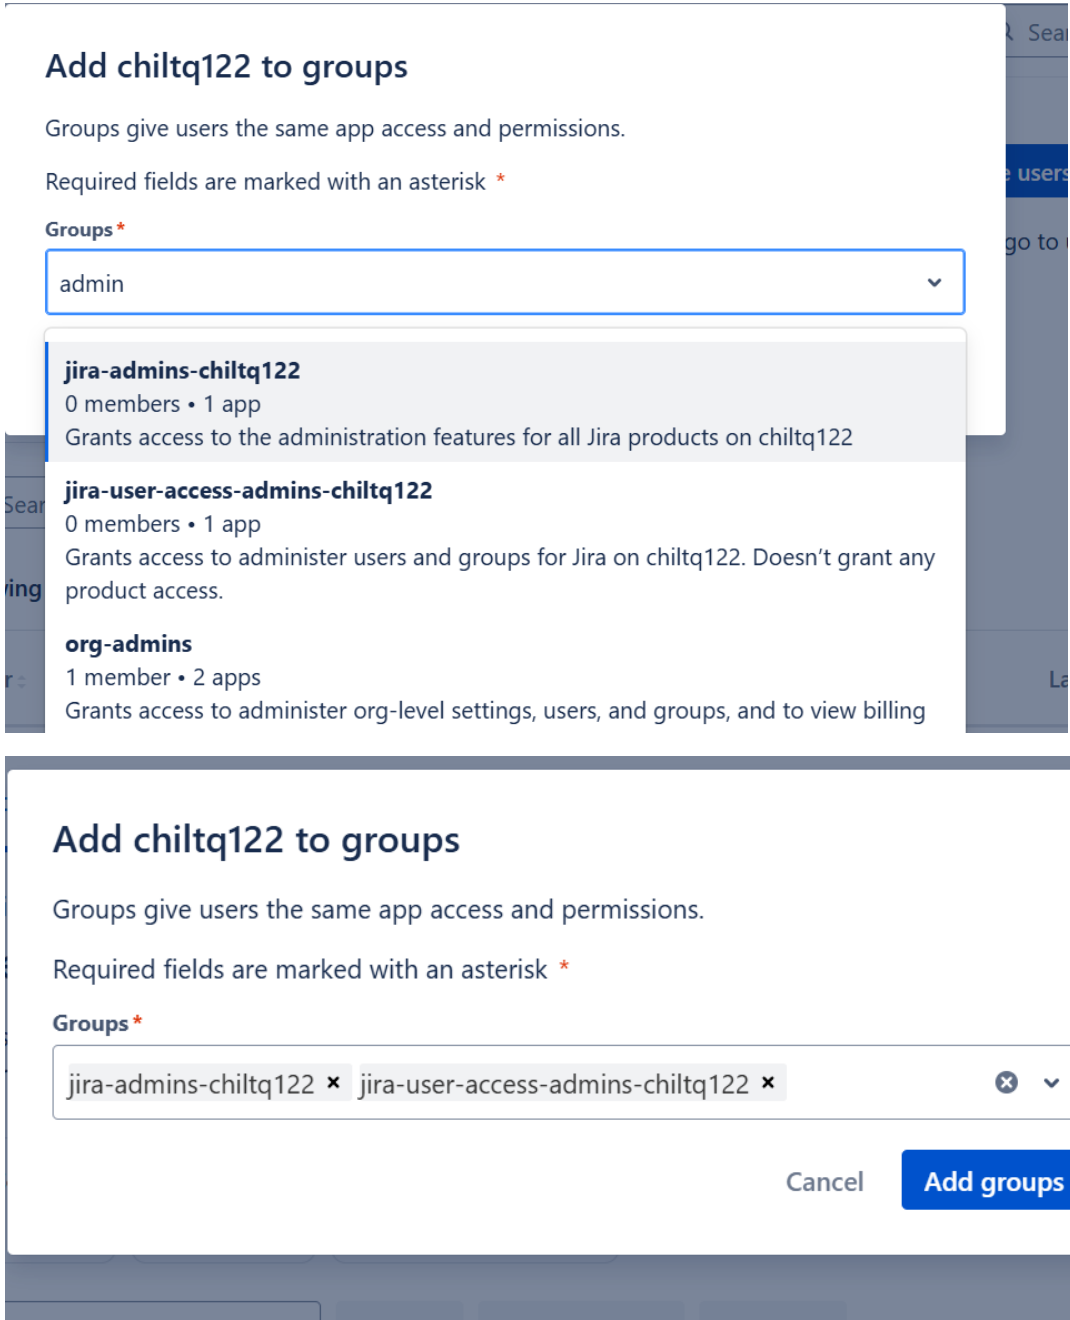

Click “Manage users”:

Click icon “ba chấm” chọn Add to group:

Nhập “admin” và chọn tất cả các group liên quan:

3. Tạo template để tạo testcase (dựa vào file TestcaseTemplate):

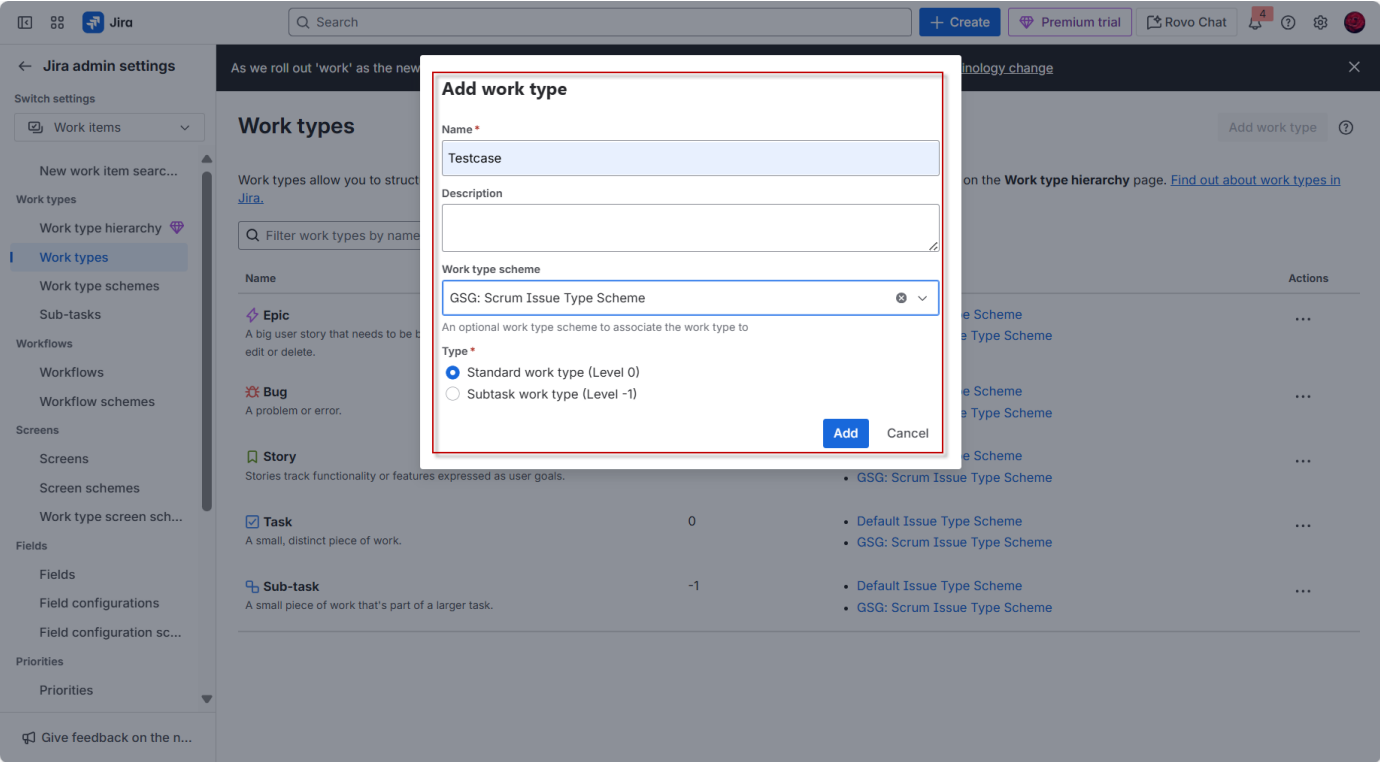

Bước 1: Vào setting → Issue để chọn “Work items”

The screenshot shows the Jira interface. On the left is the sidebar with navigation options. The main area displays the 'GSG board' with a list of work items under 'GSG Sprint 1'. On the right, the 'Personal Jira settings' dropdown menu is open, showing various settings categories. The 'Work items' option is highlighted with a red box, and a red arrow points to it from the right side of the screen.

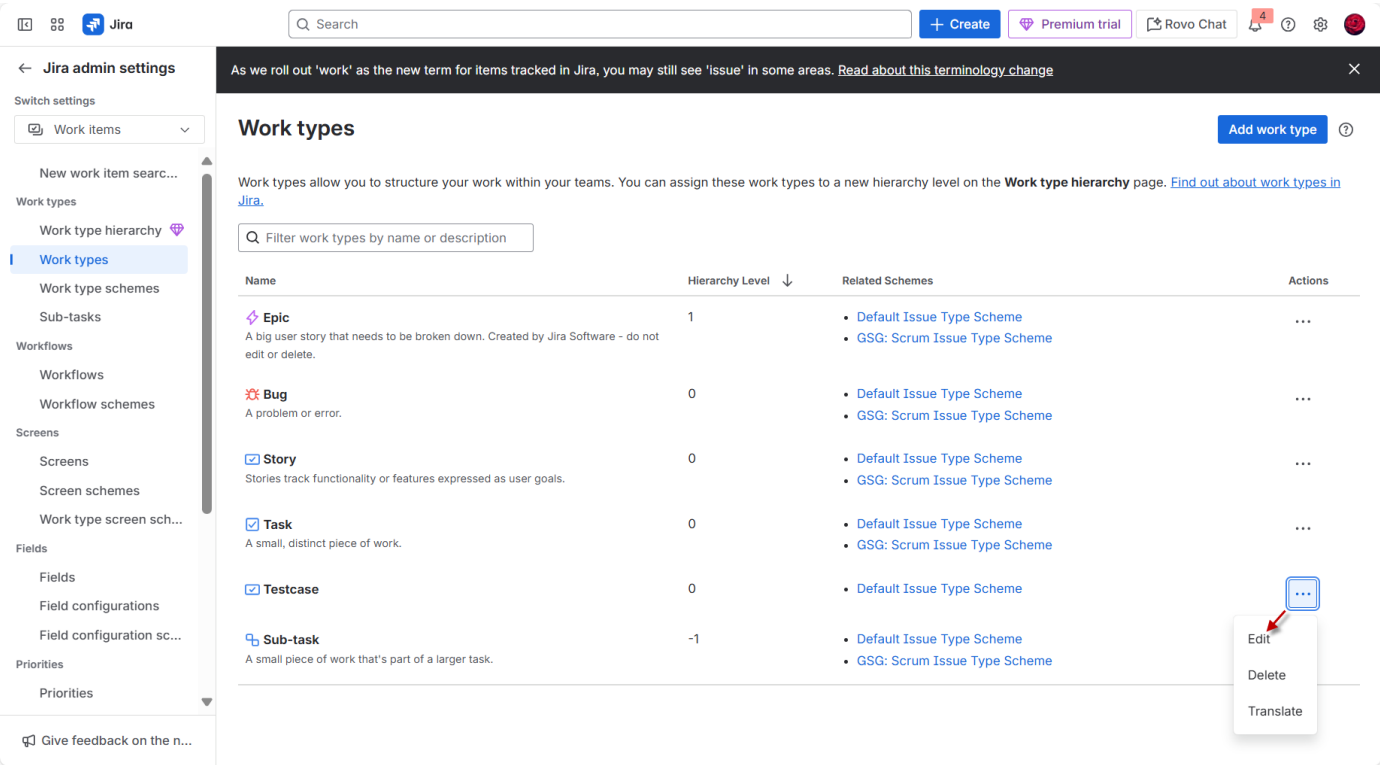

Bước 2: Click chọn Add work type:

The screenshot shows the 'Work types' configuration page in Jira. A banner at the top mentions a terminology change from 'work' to 'issue'. The left sidebar shows the 'Jira admin settings' menu with 'Work types' selected. The main content area has a search bar and a table of work types. The 'Add work type' button is highlighted in the top right corner.

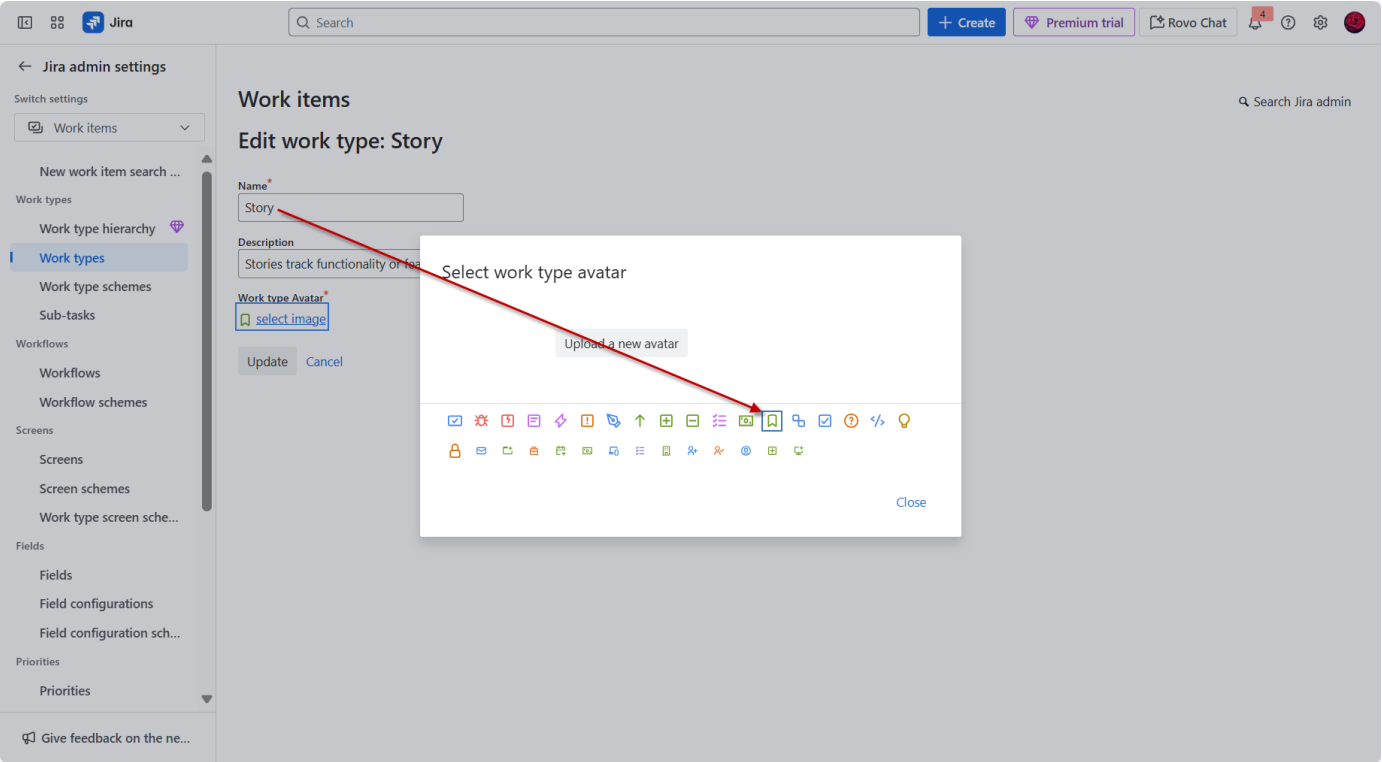

Name	Hierarchy Level	Related Schemes	Actions
Epic A big user story that needs to be broken down. Created by Jira Software - do not edit or delete.	1	- Default Issue Type Scheme - GSG: Scrum Issue Type Scheme	...
Bug A problem or error.	0	- Default Issue Type Scheme - GSG: Scrum Issue Type Scheme	...
Story Stories track functionality or features expressed as user goals.	0	- Default Issue Type Scheme - GSG: Scrum Issue Type Scheme	...
Task A small, distinct piece of work.	0	- Default Issue Type Scheme - GSG: Scrum Issue Type Scheme	...
Sub-task A small piece of work that's part of a larger task.	-1	- Default Issue Type Scheme - GSG: Scrum Issue Type Scheme	...

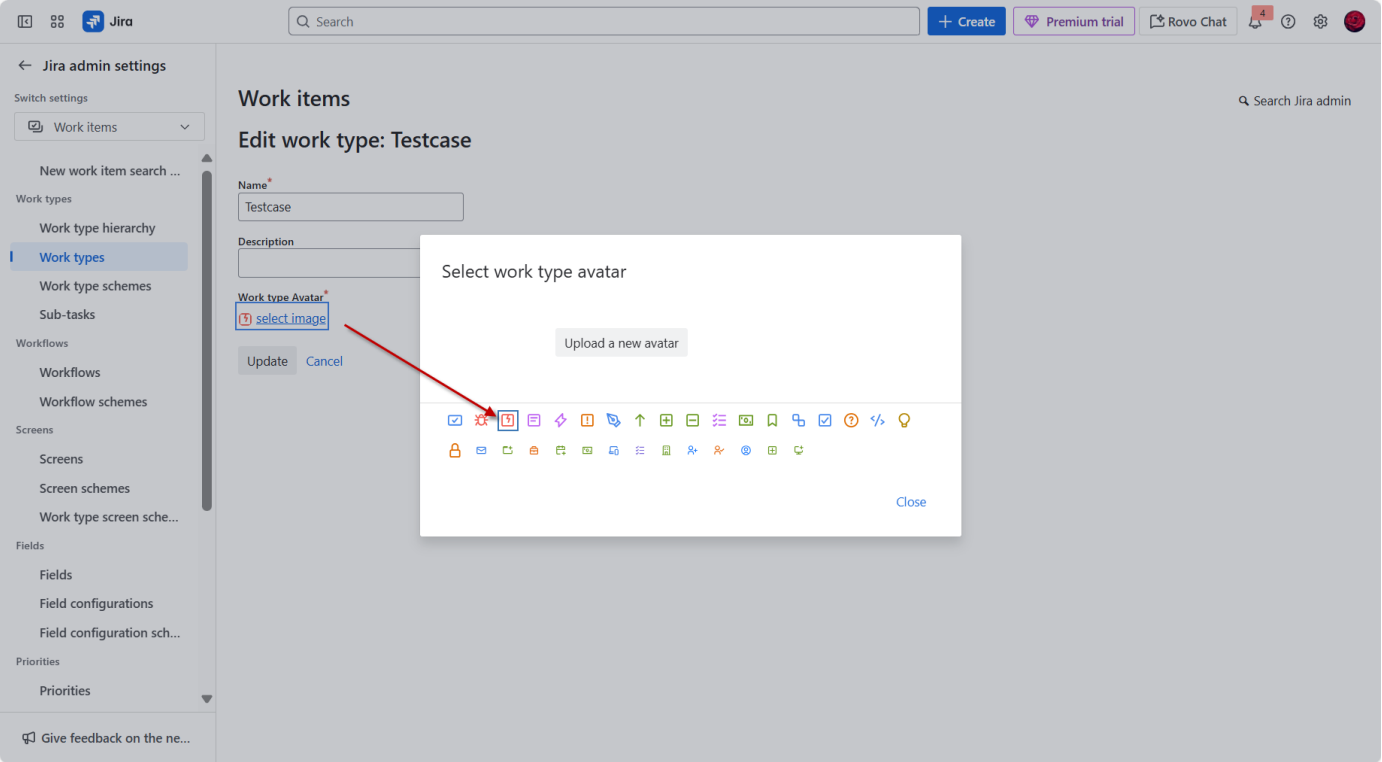

Bước 3: EDIT ICON CHO TESTCASE:

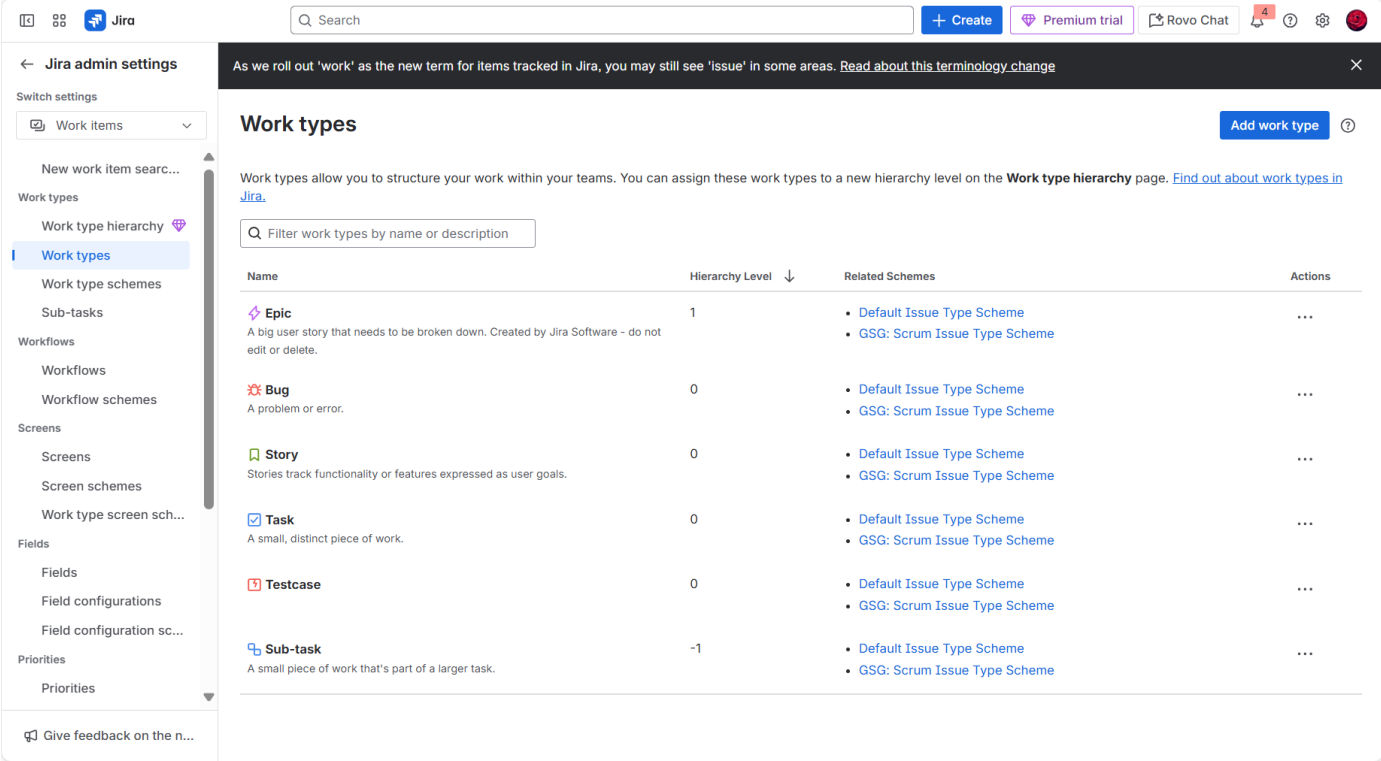

Bước 4: change icon cho User Story:

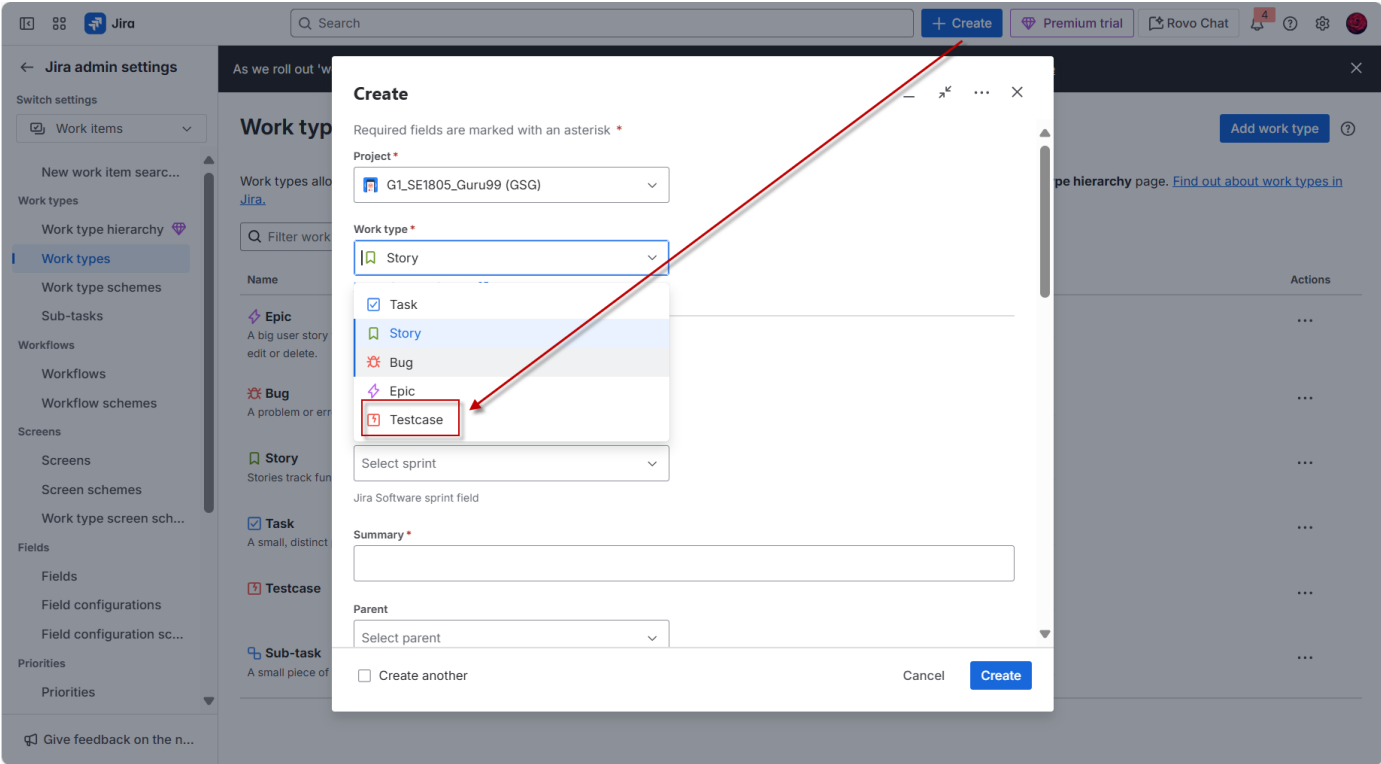

CHANGE ICON CHO TESTCASE:

Bước 2: Create → Story để kiểm tra các field vừa tạo đã hiển thị trên project chưa:

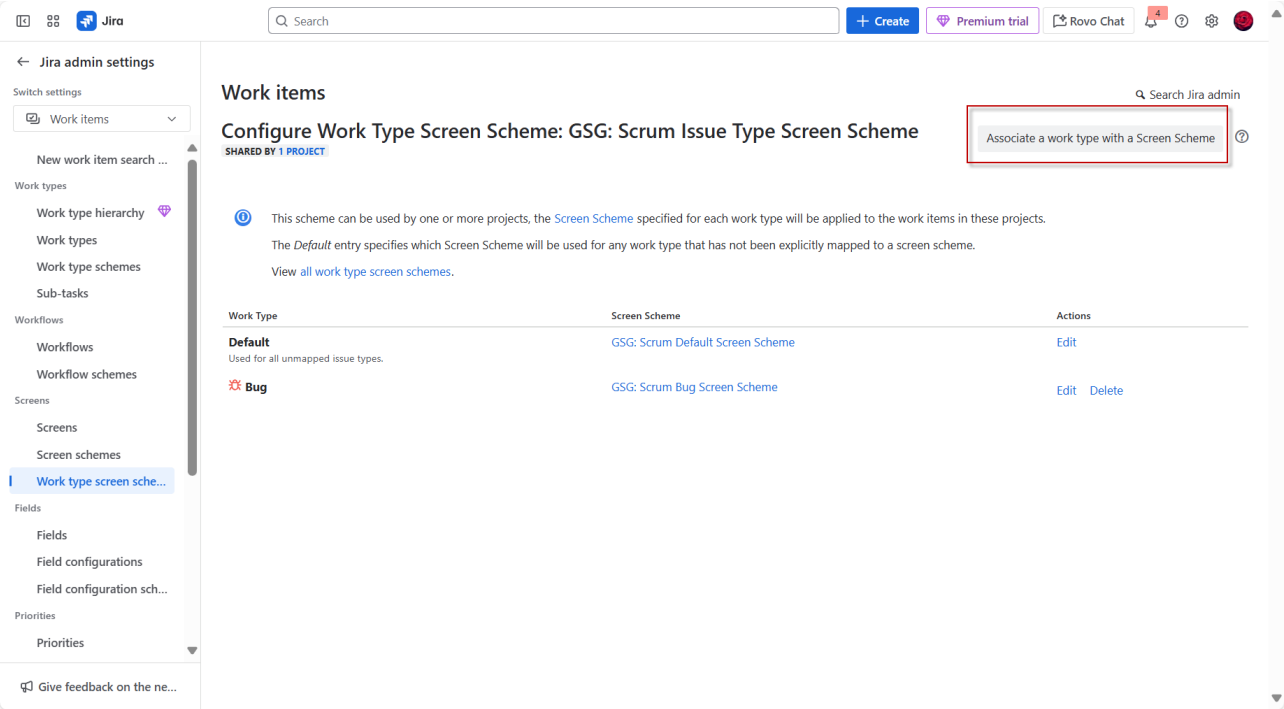

Tạo screen scheme khi tạo Testcase thì hiển thị các field customize trên, khi chọn Story sẽ không hiển thị các field mới:

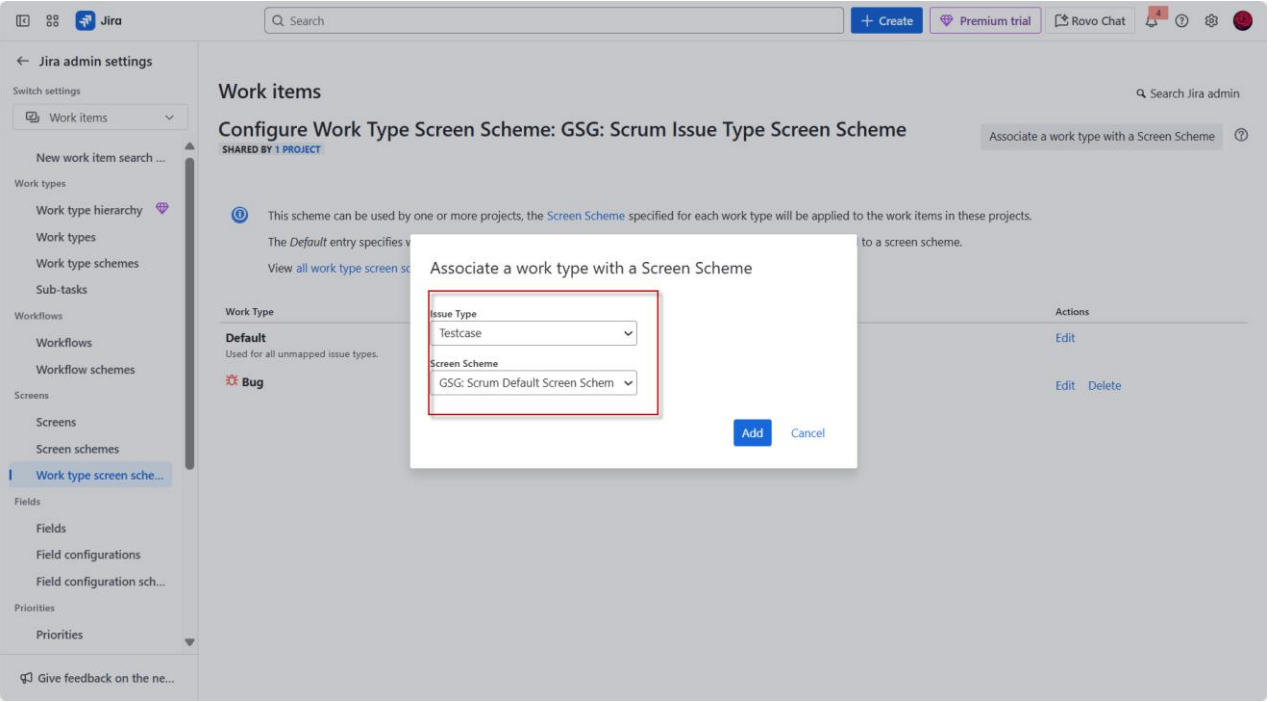

Vào Worktype Screen Schemes → Chọn screen scheme dự án vừa tạo → Configure:

Click “Associate a work type with a Screen Scheme”

Chọn IssueType là “Testcase”

Kết quả:

Work items

Configure Work Type Screen Scheme: GSG: Scrum Issue Type Screen Scheme

SHARED BY 1 PROJECT

Associate a work type with a Screen Scheme

This scheme can be used by one or more projects, the [Screen Scheme](#) specified for each work type will be applied to the work items in these projects. The *Default* entry specifies which Screen Scheme will be used for any work type that has not been explicitly mapped to a screen scheme. [View all work type screen schemes.](#)

Work Type	Screen Scheme	Actions
Default Used for all unmapped issue types.	GSG: Scrum Default Screen Scheme	Edit
Bug	GSG: Scrum Bug Screen Scheme	Edit Delete
Testcase	GSG: Scrum Default Screen Scheme	Edit Delete

Update Work Type “Default” sang “[Default Screen Scheme](#)”:

Work items

Configure Work Type Screen Scheme: GSG: Scrum Issue Type Screen Scheme

SHARED BY 1 PROJECT

Associate a work type with a Screen Scheme

This scheme can be used by one or more projects, the [Screen Scheme](#) specified for each work type will be applied to the work items in these projects. The *Default* entry specifies which Screen Scheme will be used for any work type that has not been explicitly mapped to a screen scheme. [View all work type screen schemes.](#)

Work Type	Screen Scheme	Actions
Default Used for all unmapped issue types.	Default Screen Scheme	Edit
Bug	GSG: Scrum Bug Screen Scheme	Edit Delete
Testcase	GSG: Scrum Default Screen Scheme	Edit Delete

Kết quả: click “Create”, chọn Work Type là “Story”: không show các field mới.
chọn “Testcase”: show các field mới.

4. Tạo Epic (các module/chức năng của project)

Dựa vào tài liệu dự án (file SRS) để xác định dự án có bao nhiêu module

(Xem file SRS_V4 project Banking Guru99)

Description of the modules

Module Name (SR#)	Applicable Roles	Description
Balance Enquiry	Manager Customer	Customer: A customer can have multiple bank accounts. He can view balance of his accounts <u>only</u> Manager: A manager can view balance of all the customers who come under his supervision
Fund Transfer	Manager Customer	Customer: A customer <u>can have</u> transfer funds from his "own" account to any destination account. Manager: A manager can transfer funds from any source bank account to destination account
Mini Statement	Manager Customer	A Mini statement will show last 5 transactions of an <u>account</u> Customer: A customer can see <u>mini-statement</u> of only his "own" accounts Manager: A manager can see <u>mini-statement</u> of any

Epics & Features (chuẩn hoá theo nghiệp vụ)

1. Customer Management → Epic

- New Customer, Edit Customer, Delete Customer (*Manager*) → *Userstory*

2. Account Management → Epic

- New Account, Edit Account, Delete Account (*Manager*) → *Userstory*

3. Transaction Management → Epic

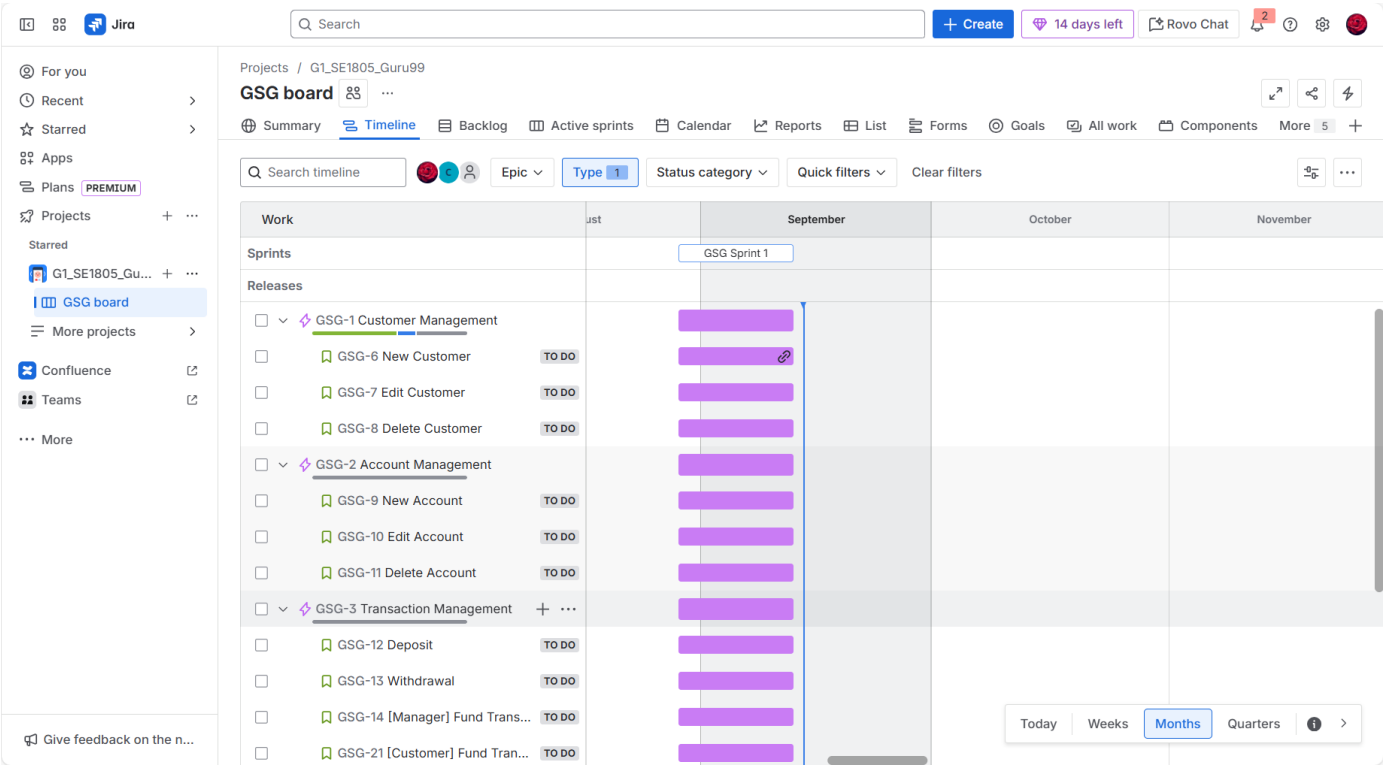

- Deposit, Withdrawal (*Manager*) → *Userstory*
- Fund Transfer (*Manager, Customer*) → *Userstory*

4. Inquiry & Statement → Epic

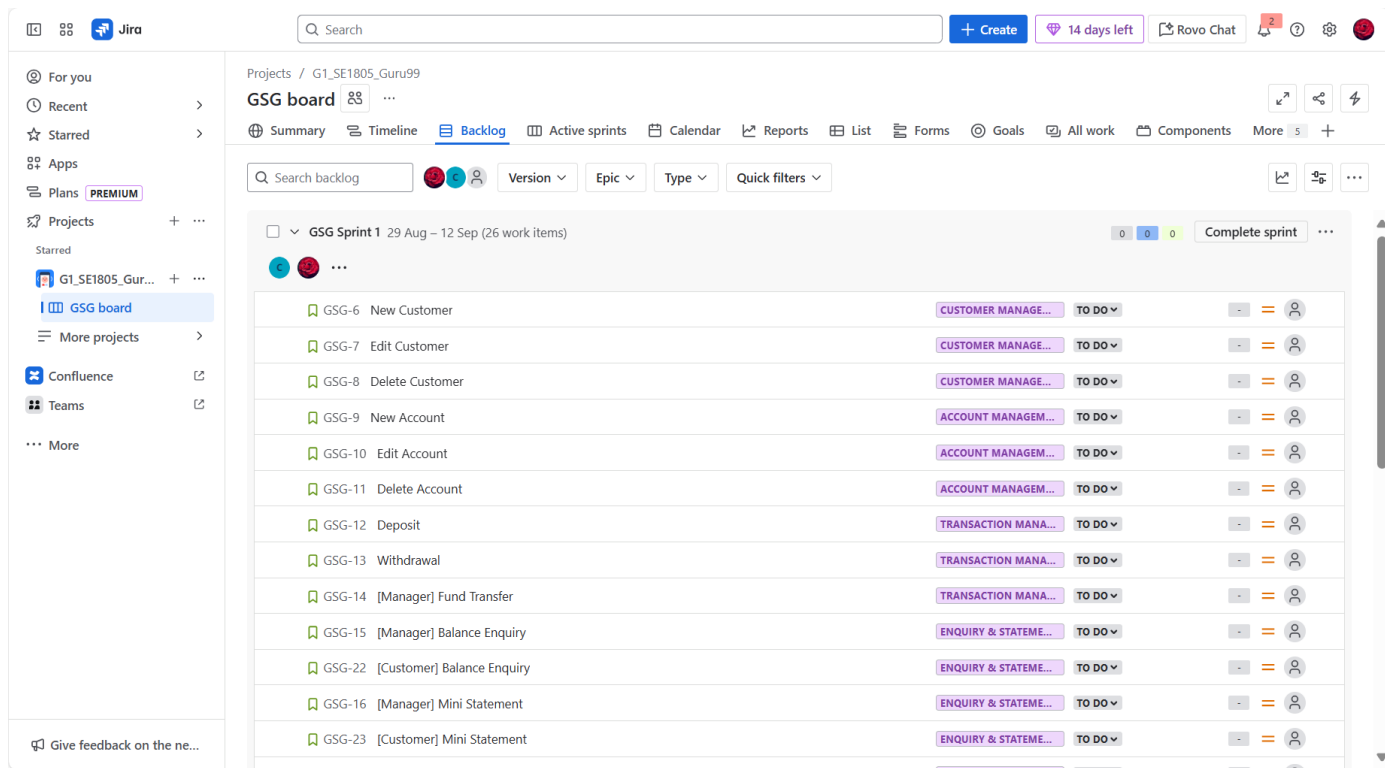

- Balance Enquiry (*Manager, Customer*) → *Userstory*
- Mini Statement (*Manager, Customer*) → *Userstory*
- Customized Statement (*Manager, Customer*) → *Userstory*

5. Auth & Security → Epic

- Change Password (Manager, Customer) → Userstory
- Login & Logout (Manager, Customer) → Userstory

Vào Backlog → Kéo thả toàn bộ User story đã tạo ở trên vào Sprint 1 (default tạo sẵn)

5. Viết Test Case cho User Story trong Jira (Functional & Technical)

5.1 Nguyên tắc

- Mỗi User Story trong backlog Jira cần được cover bởi **Functional (Fxx)** và **Technical (Txx)** testcase từ SRS.
- Khi tạo testcase trong Jira, tuân thủ:
 - Functional (Fxx):**
 - Fxx-[STT] - [Tên User Story] → [Mục tiêu kiểm thử] (Positive/Negative)
 - Technical (Txx):**
 - Txx-[STT] - **Verify** [Field/Rule]: [Mục tiêu kiểm thử] (Positive/Negative)
- Requirement Mapping:** Link tới User Story ID (ví dụ: US-CUST-01)
- Test Level:**
 - Unit → kiểm tra field validation.
 - Integration → kiểm tra form + DB + API trong phạm vi 1 User Story.
 - System → end-to-end flow qua nhiều User Story/Epic.
- Luôn phân biệt **Positive Testcase** (hợp lệ, flow thành công) và **Negative Testcase** (lỗi, validation, input sai).

5.2 Ví dụ (Module Customer Management)

User Story: US-CUST-01 – Add New Customer

- **Functional (Fxx):**
 - F33-01 – Add New Customer → Success with unique email (Positive)
 - Mapping: US-CUST-01
 - Level: Integration
 - F33-02 – Add New Customer → Duplicate email not allowed (Negative)
 - Mapping: US-CUST-01
 - Level: Integration
- **Technical (Txx):**
 - T28-01 – Verify Email: Accept valid email format (Positive)
 - Mapping: US-CUST-01
 - Level: Unit
 - T28-02 – Verify Email: Reject invalid email format (Negative)
 - Mapping: US-CUST-01
 - Level: Unit
 - T21-01 – Verify PIN: Accept PIN with exactly 6 digits (Positive)
 - Mapping: US-CUST-01
 - Level: Unit
 - T21-02 – Verify PIN: Reject PIN not equal 6 digits (Negative)
 - Mapping: US-CUST-01
 - Level: Unit

5.3 Checklist:

- **Summary:** viết theo format chuẩn (Fxx cho flow, Txx với “Verify ...” cho validation).
- **Requirement Mapping:** link User Story ID trong Jira.
- **Test Level:** chọn đúng (Unit/Integration/System).
- Mỗi User Story có ≥ 2 testcase Functional và ≥ 2 testcase Technical.
- Technical testcase nên có cặp Positive/Negative cho mỗi rule quan trọng (như Email, PIN, Password...)

Kế hoạch triển khai Testcase (Full Coverage)

1. **Customer Management**
 - User Stories: New Customer, Edit Customer, Delete Customer
 - Functional: F23–F25, F33–F36
 - Technical: T4–T29, T45–T47, T47.1, T58–T81
2. **Account Management**
 - User Stories: New Account, Edit Account, Delete Account
 - Functional: F26–F32
 - Technical: T1–T3.1, T42–T44, T55–T57
3. **Transaction Management**
 - User Stories: Deposit, Withdrawal, Fund Transfer
 - Functional: F5–F22
 - Technical: T48–T54, T82–T91, T104–T110
4. **Inquiry & Statement**
 - User Stories: Balance Enquiry, Mini Statement, Customized Statement
 - Functional: F1–F4, F39–F47, F48–F49
 - Technical: T30–T41, T94–T96
5. **Auth & Security**
 - User Stories: Login, Logout, Change Password

- Functional: F37–F38
- Technical: T92–T103
